Professional Summary

Experienced full-stack developer delivering polished web applications, ERP solutions, and business systems. I build user-focused software for hospitals, pharmacies, retail, and business operations with strong UI, secure APIs, and data-driven workflows.

Core Expertise

- Custom ERP and business automation platforms
- Responsive React and Tailwind interfaces
- REST API integration and backend services
- Database design, reporting, and analytics
- Hospital management, pharmacy systems, and POS solutions

Selected Projects

Pharmacy Management System

- Delivered inventory control, billing, prescription tracking, and reporting for pharmacy clients.

Hospital Management System

- Built patient workflows, appointment scheduling, billing, and clinical operations functionality.

Ticketing System

- Developed support ticket tracking, SLA management, and analytics dashboards.

Professional Experience

2025 - Present | Independent Consultant

Senior Web & ERP Developer

- Delivered custom ERP and web app solutions for business automation, reporting, and client operations.

2023 - 2025 | Digital Systems Lab

Lead Software Engineer

- Led development of enterprise web applications, API platforms, and dashboards for operations and analytics.

2021 - 2023 | Creative Agency

Full-Stack Developer

- Created client-facing websites, portals, and backend services with an emphasis on usability and reliable performance.

Education & Certifications

- Professional Web Development — Tech Academy
- Database Design & MySQL — Cloud University
- Software Architecture — Enterprise Learning

Availability

Open to new web development and ERP projects. Ready to deliver fast, secure, and user-friendly business systems.
